

Jose Prieto

Hi, I am a Spanish volunteer in Lithuania. I'm 28 years old and after different periods of work, studies and volunteering in my country I decided to come here for learning something new, discover Lithuania, discover people and work in a National Park! I arrived here in March and I will stay until November.

Until now I was studying two years of History, working in many jobs, normally treating with people. This is very common for young people because in Spain we live principally from tourism. So I was working as a waiter, as a taxi-bike driver, in concerts... but also in kindergarten or as a coordinator team in UNHCR, developing programs for a better diffusion of the refugee's issues. We made these programs at universities or in the street.

I am an enthusiastic of nature and sports, and specially the combination of both! So my passion is hiking, mountaineering and climbing. Swimming and diving as well. In Spain, I was born and grown in a city with sea and mountains, so I spend the majority of my time doing this.

I also like traveling. It's the best way of grow, and of course the best way for meeting new friends. I have been in around 10 countries, but never for such a long period as here. I like to travel in different manners, by car, hitchhiking, cycling...

But without doubt, the best thing for me is to meet new people, and realize that in the world we are all almost the same in essence!

Hope to see you soon and help you!
